

VICTRON ENERGY Ekrano GX | Product Numbers

Ekrano GX Communication Centre with Built-in 7" Touchscreen BPP900480100

What is the Ekrano GX?

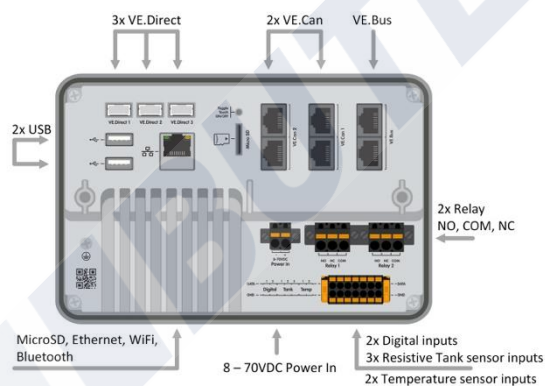

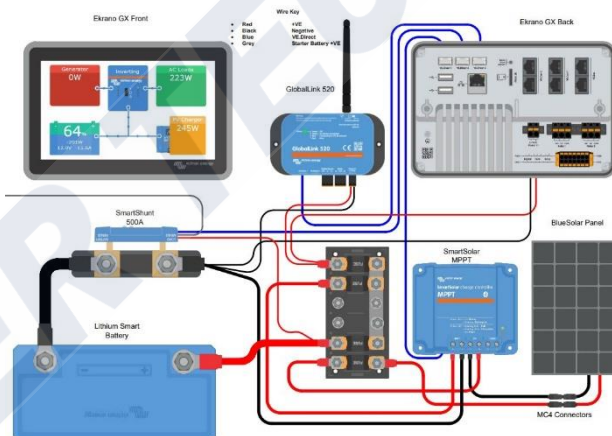

The Ekrano GX is the Latest generation control and communication centre from Victron Energy, it is fully loaded with all the best features of a GX device but with a Built-in 7" touch screen Display

Why use the Ekrano GX?

The all-new layout design lends itself to quick and easy installation and is great for compact locations. The Ekrano can Monitor a range of Victron Devices and other equipment such as temperature sensors and level sensors.

Is it Easy to fit?

The Ekrano is very easy to install, all it requires is a power connection and then simply run the appropriate cables between the Ekrano and your devices.

What else can I do with the Ekrano GX

As well as having Bluetooth, and built in Wifi for remote monitoring, the system also supports remote console meaning you can have full access to the screen, from any laptop or smartphone if connected to the Victron VRM. Easily done when used with a GlobalLink 520

Useful Info.

The Ekrano is a great upgrade to an existing installation that uses any other GX device.
